Yeah, Im surprised they even went to the trouble of saying that it is a liquid.

Well that MSDS was almost helpful; "no data available", that's my new favorite phrase! LPK.

All,
Please see the attached MSDS.

Regards,

Thanks.

Can you have someone make a copy of the MSDS and send it to me by email. Our office of solid waste is needing a MSDS for something they have to do on the site.

We received 5 grams of neat material (liquid form) -- and this material was accompanied by an MSDS.

We can certainly give Raj a gram or two of the material -- [REDACTED] will split it up when he arrives.

Hi [REDACTED]
Ex. 6 - Personal Privacy

How much of the standard did we receive? Did a MSDS sheet come with the standard?

I promised Raj Singhvi with the ERT lab in R2 some of the standard, so could you divide up the standard and I will have him come get it.

We need to see what solvent this stuff is soluble in so it can be diluted and then injected onto a GC/MS first to see if it will elute, then we can go from there.

Terry

Terry and Larry,

Today we received a sample of the methylcyclohexane methanol for use as a standard material for West Virginia Chemical Spill analytical testing. Did we want to share this material with another lab in Region 2? Would you like for us to begin with methods development for this chemical? How would you like for us to proceed?
